

Who will provide me
with a customised web application?

COMPU
MASTER®

Conception and Web Applications

CompuMaster

CompuMaster develops concepts and web applications for medium-sized and big enterprises and organisations and offers instruments around the operation and marketing of your web presence mainly focussing the management of contents and data of all kind. By this, we want to put you into the position to minimise frictional losses in your working procedures and to precisely address your target group.

Our portfolio contains particularly:

- Linking between internet, intranet and extranet
- Web based media administration
- Shop and ticket systems
- e-marketing
- Database development
- Content management systems
- Website configuration and service
- Development of web-based applications for companies

CompuMaster. Since 1998.

Since the foundation of our company in 1998, it has been our intention not only to develop inspirational concepts or applications but also to be a reliable partner to our customers. Convince yourself of our central role in this field and the outstanding features of our solutions:

- Future-oriented and quick
- Efficient and flexible
- Adaptable to working procedures
- Intuitively operable
- Centrally manageable
- Decentrally administrable
- Cost conscious

References

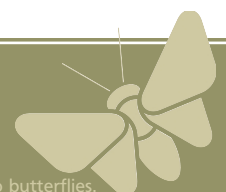

We support customers of most different branches and markets.

Our customers have something in common:
The professional and efficient use of the Web media, taking into account the suppliers' point of view as well as the multiple demands of customers and visitors.
